

AFTERMARKET & SPARE PARTS PRODUCTS

Access to a reliable source of equipment components and spare parts for your water treatment systems is critical. Veolia supplies a wide variety of aftermarket equipment, instrumentation, and parts from the most reputable manufacturers in the industry. Through a wide range of technologies, equipment, and manufacturers, Veolia offers solutions for almost any water treatment need.

Pumps

Chemical Dosing Pumps

RO Housings & Pressure Vessels

Chemical Storage and Containment

Membranes

Boiler & Tower Controllers and Instrumentation

Filter Housings, Cartridges & Bags

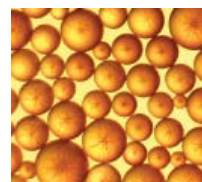

Valves

UV Equipment

Water Meters

Resin & Media

Lab Equipment and Supplies

AFTERMARKET & SPARE PARTS PRODUCTS

Veolia's Aftermarket group can assist you with:

- Proper selection and purchase of technologies, equipment and parts to meet your specific application
- Technical support of equipment and Veolia's standard product technologies
- Spare parts recommendations for both pre-engineered equipment and Veolia's standard product technologies

A few of the many manufacturers represented by Veolia:

- **Advantage Controls** - microprocessor controllers & systems
- **Aquafine** - ultraviolet disinfection equipment
- **Aquamatic/AQ Matic** - diaphragm valves & accessories
- **Allen Bradley** - PLCs, HMI, and other electronics
- **Assmann** - polyethylene storage tanks
- **Blue White** - peristaltic metering pumps and rotometers
- **Carlton Meters** - turbine, multijet, and positive displacement water meters
- **Codeline/Pentair** - RO pressure vessels
- **Dow Water Solutions** - Dowex ion exchange resin
- **Endress & Hauser** - instrumentation for pressure, flow, level, and analytics
- **FilmTec** - RO and UF membranes
- **Fleck/Pentair** - top-mount control valves for filters and water softeners
- **Grundfos** - circulation, chemical dosing, & booster pumps
- **Hach** - field and laboratory testing instruments, supplies and accessories
- **Hydranautics** - RO membranes
- **Keystone** - gear operated and actuated butterfly valves
- **LMI/Milton Roy** - chemical feed equipment
- **Neptune** - corporation stops, high pressure chemical feed pumps, mixers
- **Plas-Tanks** - fiberglass storage tanks and bulk briners
- **Prominent** - chemical metering pumps and controllers for boilers & cooling towers
- **Pulsafeeder** - chemical metering pumps and controllers for boilers & cooling towers
- **Purolite** - ion exchange resins
- **ResinTech** - ion exchange resins
- **Rosedale** - filter housings for bag filters and cartridge filters
- **Rosemount** - controllers and monitoring for liquid analytics and measurement
- **Signet** - monitoring equipment for pressure, flow, conductivity, and analytics
- **Stenner** - peristaltic metering pumps
- **Structural Fibers/Pentair** - fiberglass pressure vessels
- **Toray** - RO membranes
- **UltraTech** - spill containment products for chemical IBC, drums, etc.
- **Walchem** - chemical metering pumps and controllers for boilers & cooling towers

Related Veolia Services for your facility's needs:

- Water management specialists utilize our proprietary Hydrex™ treatments to ensure reliable and efficient water usage
- Standardized, pre-engineered equipment technologies to provide efficient and cost effective solutions for water being used in boiler make-up, cooling towers, or wastewater & recycle applications.
- Extended Services, using trained operational staffing for system start ups, commissioning, & full time operation
- Equipment Maintenance & Repair teams offer on-site preventative and corrective maintenance services
- Mobile Water Services can deploy quickly and effectively for both planned & emergency situations
- Returnable, rental Service Deionization vessels that eliminate the need to install and operate your own system
